LA PIETRA PROTAGONISTA

Quando pensiamo alle nostre origini è la madre Terra che richiamiamo. La terra che i greci con rispetto chiamavano Gea e i romani Tellus, Gaia Tellure. La terra appunto, uno degli archetipi che insieme con l'acqua, l'aria e il fuoco costituisce le fondamenta della vita e che Jung ci aiuta ad esplorare. L'uomo e la terra dunque, una relazione di gliolanza ancestrale; un sentimento di appartenenza potente, ineludibile declinato nei modi di pensare e agire propri di ogni epoca ed età che la geopsicologia studia per assicurare il benessere, la miglior qualità di vita. Tale formidabile relazione emotiva trova nella pietra, il comune sasso, il segno frattale più rappresentativo della terra: - il tutto e la parte. La pietra appunto, elemento insigni cante, inerte, ordinario può rivelarsi invece in quanto parte della terra, simbolo vero della sua fecondità creatrice. La pietra, rivalutata dall'arte e dal design per la sua incredibile, inattesa qualità creativa diviene così elemento prossemico d'arredo, di decoro, di marcamento territoriale e segnaletico, di ambientazione scenogra ca: protagonista assoluta dei paesaggi, degli spazi antropici e delle relazioni sociali. E può persino connaturalizzare, facilitare cioè nell'uomo dismagato del terzo millennio, il recupero di un suo rapporto con la natura più armonico e sereno, di reciproco rispetto. Il design dunque, rende loquace la pietra; le dà facoltà di parlare, comunicare, dialogare. Ecco la pietra che parla, racconta, precorre, testimonia attraverso le forme, i volumi, le texure,le incisioni, i colori, le composizioni, i contesti.
I designer della Rockolors come moderni demiurghi interrogano ed interpretano le pietre componendo le più diverse e peculiari partiture policrome creando atmosfere e climi congeniali al singolo e a gruppi
Quanti spettacoli possibili! Tutto è connaturale: la pietra componente d'ambiente per interni ed esterni senza soluzione di continuità tra il naturale e l'artefatto riconcilia l'uomo con la terra rinforzando lo spirito del focolare della casa e comunitario del vicus, del villaggio dove il totem è la terra e la pietra il suo feticcio.
La pietra che parla trova in sé la forza per esprimersi nella forma, nel contesto, nella relazionalità spaziale, ma ancor più impara a parlare, anzi a conversare attraverso il progetto dove incontra colore, altro protagonista. Il colore infatti, ne diviene il plus valore attraverso cui la pietra-parola diventa frase, discorso, linguaggio urbano e sociale: concorso di civiltà. Le pietre colorate ravvivano le case occupando spazi sgombri e divenendo oggetti cari; vivacizzano le piazze incuriosendo i bambini in cui abitualmente giocano e rumoreggiano e stimolando gli anziani che siedono alle panchine a ricordare; incendiano gli spazi verdi in un tripudio di colori e morfologie
La pietra colorata è vita tra conformismo e trasgressione.

Giordano Pierlorenzi
Direttore dell'Accademia di Design Poliarte di Ancona

FRA TRADIZIONE E INNOVAZIONE

TRE GENERAZIONI DI ESPERTI CAVATORI
TREE GENERATIONS OF SKILLED QUARRYMEN

Rockolors nasce dal connubio fra tradizione ed innovazione:

TRADIZIONE, essendo il brand frutto dell'esperienza di una realtà ben consolidata nel territorio: il Gruppo Casavecchia, che opera da oltre 50 anni nell'escavazione e commercializzazione della pietra. Il Gruppo, nato come azienda familiare a cavallo degli anni '60 e gestito dalla famiglia Casavecchia ad oggi giunta alla terza generazione, è in costante evoluzione in termini di offerta e qualità e ha raggiunto negli anni importanti riconoscimenti pur sempre mantenendo il legame con le proprie radici. Un'esperienza radicata nella vita e nel cuore di questa famiglia, che conosce la Pietra come le sue tasche.

INNOVAZIONE, poiché questo legame ha fatto sì che l'azienda continuasse ad investire sull'evoluzione del prodotto, ricercando le giuste soluzioni in grado di adattarsi alle nuove esigenze del mercato e coinvolgere diversi campi di applicazione.
Grazie all'ausilio dei migliori chimici a livello europeo e ad un semplice errore di miscelazione, i nostri esperti hanno trovato l'ingrediente segreto in grado di colorare indelebilmente le nostre pietre, rendendole inerti e per questo protette dagli agenti atmosferici.

Rockolors is the result of the combination between tradition and innovation:
TRADITION as the brand comes from the experience of a consolidated reality in the territory: The Casavecchia Group, which has been operating for over 50 years in the excavation and commercialisation of stone. The Group, born as a family business at the turn of the 60s and managed by the Casavecchia family - now in its third generation - is constantly evolving in terms of supply and quality and has achieved significant recognition over the years, always keeping the bond with its origins. An experience rooted in the life and heart of this family, whose members know Stone like the back of their hands.

INNOVATION Since this attachment led the company to continue investing in the evolution of the product, seeking the right solutions to adapt to new market needs and involve different fields of application.
Thanks to the help of the best European chemists and to an oversight during the blending operation, our experts managed to find the secret ingredient that enabled us to color our stones indelibly, making them inert and therefore protected from atmospheric agents.

CHE COS'È ROCKOLORS

TUTTA LA QUALITÀ DEL MADE IN ITALY
HIGH QUALITY OF MADE IN ITALY

Rockolors – il primo brand al mondo di arredo in pietre colorate certificate – si pone come missione primaria quella di valorizzare gli ambienti esterni ed interni, senza limiti di applicazione.

L'Innovativo brand, lanciato nel 2017offre una gamma ricchissima in termini di dimensioni, aspetti e colori e vanta prestigiose certificazioni internazionali per utilizzo in ambienti esterni ed interni.
Un mix di forza e bellezza senza eguali rende i prodotti delle vere e proprie chicche di design italiano, volte alla creazione di ambienti emozionali, innovativi e tradizionali al contempo.

La pietra di cava, dalla conformazione tipica del nostro entroterra, viene estratta e accuratamente selezionata secondo una specifica gamma di aspetti e granulometrie.
A seguito di un accurato lavaggio, le pietre vengono sottoposte al trattamento di colorazione (tarato sulla loro porosità), che conferisce loro una resa naturale e semi-opaca mantenendone le tipiche irregolarità.

The main mission of Rockolos - the first brand in the world specialized in certified colored stones - is to give added value to external and internal environments without limits of application.

The innovative Brand, launched in 2017, offers a very rich range in terms of dimensions, colors and types; Rockolors boasts prestigious international certifications for outdoor and indoor applications.
A mix of strength and unmatched beauty makes the products real gems of Italian Design, aimed to create emotional and innovative environments as well as traditional atmospheres.

The quarry stone, from the typical conformation of our hinterland, it is extracted and carefully selected according to a specific range of aspects and dimentions.
After a thorough wash, the stones undergo the coloring treatment (calibrated on their porosity), which gives them a natural and semi-opaque rendering maintaining their typical irregularities.

QUALITÀ, AMBIENTE E SOCIALE

QUALITY, ENVIRONMENT AND SOCIAL

Rockolors opera in linea con i principi della sostenibilità, vantando prestigiose certificazioni internazionali di conformità.

Operando in modo ecologicamente e socialmente responsabile, la nostra attività riduce al minimo l'impatto sulla salute dell'ambiente e dell'uomo.

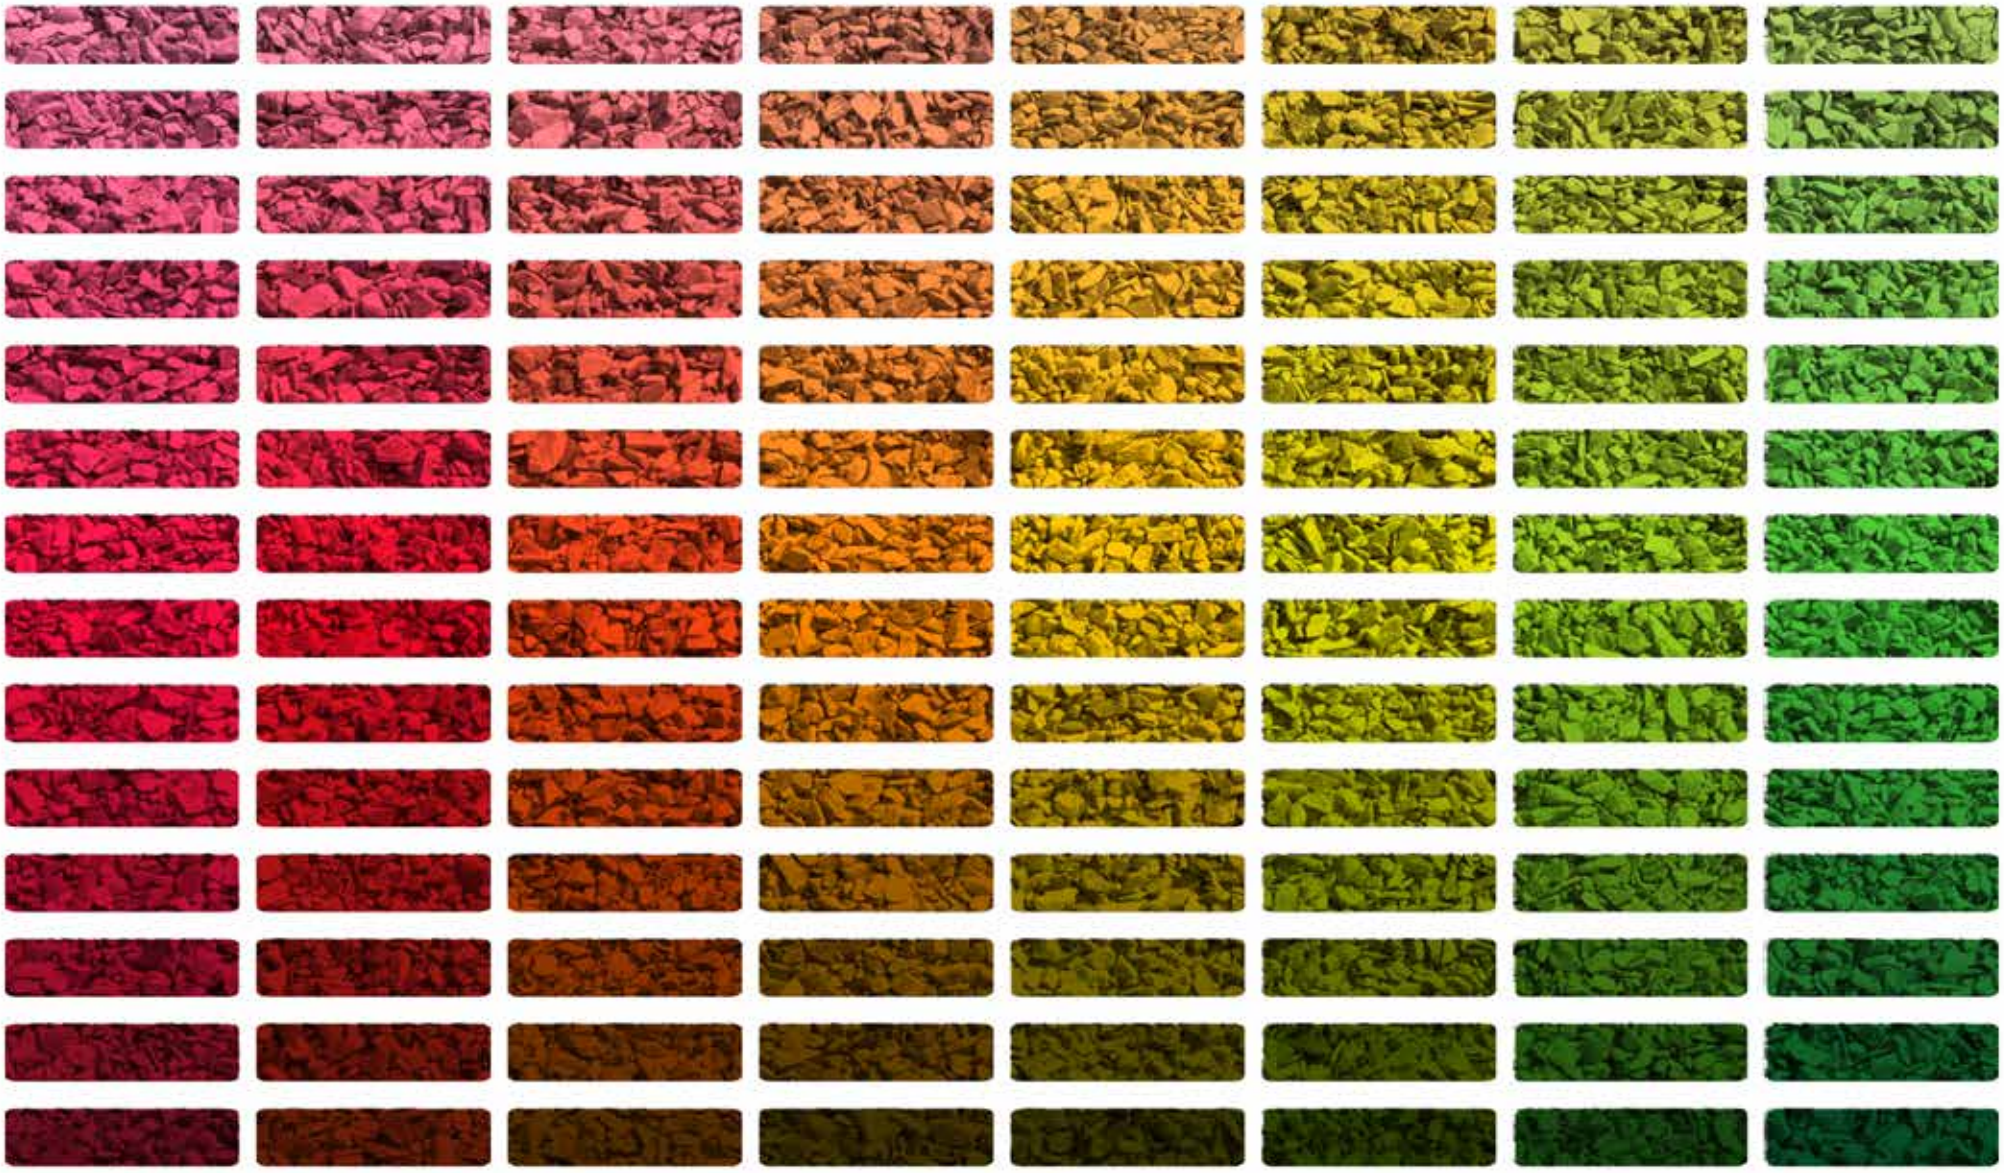
FUORI STANDARD / OUT OF STANDARD COLORS



Il sistema tintometrico integrato ci permette di individuare e riprodurre fedelmente sulle nostre pietre l'intera gamma cromatica RAL.

The integrated tinting system allows us to accurately identify and reproduce on our stones the whole RAL color space system.

ROCKOLORS NATURAL

GRANULATI DI MARMO

Da sempre apprezzati per le loro caratteristiche tecniche e di luminosità

MARBLE GRAVELS
Always appreciated for thieir technical characteristics and brightness.

GRANULATI COLOR MIX

La migliore mescolanza di graniglie studiata per ottenere effetti e contrasti cromatici unici.

COLOR MIX
The best mix of grains designed to achieve unique effects and color contrasts.

MINERAL DECO

Sostituiscono la corteccia naturale per la protezione del terreno dal freddo, dall'aridità e dalle erbacce.

MINERAL DECO
For replacing the natural bark to protect the soil from cold, dryness and weeds.

GRANULATI BASIC

Una particolare e accurata selezione di prodotti che garantiscono il migliore rapporto qualità/prezzo

BASIC GRAVELS
A particular and accurate selection of products to guarantee the best quality per price ratio.

PIETRE DECORATIVE

Sassi di provenienza mondiale, pezzi rari e unici per forma e colore, adatti al decoro dei giardini.

DECORATIVE STONES
Stones from interational origins, rare and unique pieces in terms of shape and color, suitable for decorating gardens

PIETRE SEMIPREZIOSE

Le pietre semipreziose vengono utilizzate nei decori di pregio.

SEMIPRECIOUS STONES
Semi-precious stones are used in valuable decorations.

GRANULATI DI VETRO

Granulati di vetro traslucidi utilizzati per decorare i giardini donando un tocco estetico suggestivo.

GLASS GRAVEL
Translucent glass gravels used for decorating gardens to give an aesthetic touch.

GRANULATI

GRANULATI
GRAVELS

I granulati sono pietre naturali a forma irregolare e non lavorate. Marmi, porfidi, graniti e pietre semipreziose forniti in una varietà di gamma di eccellente qualità.
Gli utilizzi principali riguardano l'arredo urbano e la decorazione delle aree verdi pubbliche e private.
I prodotti sono disponibili in differenti misure.
Una gamma cromatica senza pari nel mercato capace di accontentare anche la clientela più esigente.

The gravels are natural stones with irregular non-processed shapes . Marbles, porphyry, granites and semi-precious stones supplied in a varied range of excellent quality.
The main uses concern furnishing and decorating of public and private green areas.
The products are available in different sizes.
A peerless colour range in the market capable of satisfying even the most demanding clients.

CIOTTOLI DI MARMO

Da sempre apprezzati per le loro forme arrotondate che favoriscono la leggibilità delle venature naturali

MARBLE PEBBLES
They have always been appreciated for their rounded shapes facilitating the natural veins to be seen better.

CIOTTOLI PIATTI

Una raccolta unica, un prodotto naturale a cui l'acqua ha dato la caratteristica forma piatta e arrotondata.

FLAT PEBBLES
A unique collection, a natural product to which water has given flat and rounded shape.

CIOTTOLI LUCIDI

Lucidati per favorirne l'utilizzo in ambienti interni nelle applicazioni per decorazioni di pregio.

POLISHED PEBBLES
Polished to encourage its use in indoor environments for applications in the decorations.

CIOTTOLI NATURALI

Il ciottolo naturalmente arrotondato che presenta le colorazioni tipiche del sasso di fiume italiano.

NATURAL PEBBLES
The naturally rounded pebbles with the typical colours of the Italian river stones.

CIOTTOLI ORIENTALI

Pietre che si distinguono per le loro caratteristiche cromatiche, uniche e molto suggestive.

ORIENTAL PEBBLES
Stones distinguished by their unique and expressive chromaric characteristics.

CIOTTOLI SEMIPREZIOSI

Ciottoli esclusivi per decorazioni di alto livello.

SEMI-PRECIOUS PEBBLES
Exclusive pebbles for superior decorations.

CIOTTOLI

CIOTTOLI

PEBBLES

Un prodotto che da sempre cattura gli amanti dell'arredo del verde.
Il ciottolo subisce le trasformazioni meccaniche necessarie ad ottenere gli arrotondamenti voluti.

Gli utilizzi principali riguardano l'arredo urbano, il giardinaggio e la decorazione delle aree verdi pubbliche e private.

A product that has always captured greenery design fans.
The pebble undergoes required mechanical transformations necessary to obtain the desired rounding.

The main uses concern urban furnishing, gardening and decoration of public and private green areas.

MONOLITI

MONOLITI

MONOLITHS

Un monolito è una formazione geologica costituita da un unico blocco massiccio di pietra o roccia portato alla luce da lunghe attività di erosione su strati geologici.

Gli articoli in questa sezione riproducono i monoliti esistenti in natura, provenienti da ogni parte del mondo, permettendo alla clientela di realizzare parchi e giardini unici ed esclusivi.

Si distinguono in punte, esemplari, giochi d'acqua, statue e fontane.

A monolith is a geological formation consisting of a single solid block of stone or rock brought to light by long erosion activities of geological strata.

The articles in this section reproduce the monoliths existing in nature, from all over the world, allowing customers to create distinctive and exclusive parks and gardens.

They can be divided into points, exemplaries, water games, statues and fountains.

ROSA DEL DESERTO

Origine-Origin:Nord Africa-North Africa
Materiale-Material:Gesso-Gypsum
Finitura-Finish: Naturale-Natural
Misura-Size: 40-200 cm

GRAVELFIX

PAVIMENTAZIONE DRENANTE
DRAINING PAVING

GRAVELFIX è la soluzione consigliata per stabilizzare granulati e ciottoli decorativi e ottenere i migliori risultati per una pavimentazione economica, stabile, solida e duratura.
Progettato per risolvere le tipiche problematiche di spostamenti delle ghiaie dovuti al passaggio veicolare nei parcheggi o nelle zone di transito.

APPLICAZIONI PRINCIPALI

- parcheggi pubblici e privati
- terrazze e giardini pensili
- piste pedonali e ciclabili
- passi carrabili
- aree giochi, condominiali e cimiteriali
- parchi e giardini

VANTAGGI

- Pavimentazione drenante al 100%
- Polipropilene riciclabile
- Economico e duraturo
- Rimedio per le erbe infestanti
- Facile da posare
- Resistente al gelo e al sale
- Evita i solchi dovuti al passaggio dei mezzi
- Non necessita di manutenzione

GRAVELFIX is the recommended solution for stabilizing decorative gravels and pebbles and obtaining the best results for an economic, stable, solid and long-lasting paving.
Designed to solve the typical problems of gravel movements due to the passage of vehicles in parking lots or transit areas.

MAIN APPLICATIONS

- Public and private car parks
- Terraces and hanging gardens
- Pedestrian and cycle paths
- Driveways
- Play areas, condominiums and cemeteries
- Parks and gardens

ADVANTAGES

- 100% Draining paving
- Recyclable polypropylene
- Economical and durable
- Remedy for weeds
- Easy to install
- Frost and salt resistant
- Avoids furrows caused by the passage of vehicles
- Maintenance-free

GUIDA ALLA POSA

FONDO: al fine di realizzare una pavimentazione duratura e stabile nel tempo bisogna effettuare la posa di Gravelfix partendo da un fondo creato a regola d'arte.

1. Posizionamento e ancoraggio bordi per definire il perimetro della realizzazione, contenere la ghiaia superficiale e proteggere i bordi esterni di Gravelfix da forze laterali.
2. Compattare il fondo dell'area per renderla uniforme ed evitare avvallamenti. Si consiglia di utilizzare uno strato finale di sabbia o granulato fine ben pressato per creare un piano omogeneo, solido e stabile.
3. Adagiare i pannelli Gravelfix sulla superficie senza alcun ancoraggio, sarà il peso stesso della ghiaia a mantenere salde le griglie al terreno. I pannelli sono facilmente adattabili alla forma del progetto tagliandoli con un taglierino o semplici forbici.
4. Riempire le griglie con un granulato a scelta delle pezzature consigliate comprese tra 4 mm e 12 mm. Qualsiasi granulato e ciottolo decorativo è ideale per la realizzazione di pavimentazioni pedonali e ciclabili, mentre per uso carrabile è obbligatorio l'utilizzo di inerti a durezza elevata come graniti, porfidi, basalti e più in generale prodotti inerti per realizzare asfalti al fine di evitare un'eccessiva frammentazione dell'aggregato stesso. Riempire uniformemente i pannelli fino a formare uno strato massimo di 2 cm al di sopra del Gravelfix. Si consiglia l'utilizzo finale di una vibrofinitrice al fine di compattare in modo uniforme la superficie, altrimenti si assesterà con il tempo.
5. Una volta riempite le celle il lavoro è ultimato e la superficie sarà quindi immediatamente percorribile. L'utilizzo di ciottoli è consigliabile negli spazi frequentati da bambini per rendere la superficie meno abrasiva rispetto al granulato.

INSTALLATION GUIDE

BOTTOM: In order to achieve a long-lasting and stable paving, Gravelfix must be laid starting from a professionally created foundation.

1. Position and anchor the borders to define the perimeter of the construction, contain the surface gravel and protect the outer edges of Gravelfix from lateral forces.
2. Compact the bottom of the area to make it even and avoid sinkings. It is recommended to use a final layer of well-pressed sand or fine gravels to create a homogeneous, solid and stable base.
3. Lay the Gravelfix panels on the surface without any anchoring, it is the weight of the gravel itself that keeps the grids firmly on the ground. The panels can be easily adapted to the shape of the project by cutting them with a knife or simply by scissors.
4. Fill the grates with chippings of your choice from the recommended sizes between 5 mm and 12 mm. Any decorative gravel and pebble is ideal for the construction of pedestrian and cycle paths, while for vehicular use it is mandatory to use aggregates with higher hardness such as granite, porphyry, basalt and generally aggregate products for making asphalt in order to avoid the excessive fragmentation of the aggregate itself. Evenly fill the panels to form a layer of maximum 2 cm above the Gravelfix. As the final step, it is recommended to use a wheel paver in order to evenly press the surface, in any case it will settle with time.
5. Once the cells are filled, the work is completed and the surface will be immediately passable. The use of pebbles is recommended in spaces frequented by children to make the surface less abrasive compared to the gravels.

ALUBORD

LA BORDURA
THE EDGING

ALUBORD è la bordura ideale per gli appassionati del fai da te, ma dedicata anche ai più esigenti professionisti del paesaggio. Permette di delimitare le pavimentazioni e creare il contenimento di aiuole o vialetti realizzati in ghiaia o con autobloccanti, ciottoli resinati o altri materiali di riempimento.

DESTINAZIONI D'USO

- Aiuole, vialetti o pavimentazioni in ghiaia
- Orti
- Pavimentazioni con GRAVELFIX
- Tetti verdi

VANTAGGI

- Leggero
- Soluzione sostenibile 100% riciclabile
- Posa semplice
- Pratico
- Resistente alla corrosione
- Resistente agli agenti atmosferici
- Si adatta ad andamenti curvilinei
- Duraturo

SICUREZZA

La superficie superiore della bordura è arrotondata per evitare tagli.

POSA IN CURVA

ALUBORD è un prodotto flessibile, facile da posare anche in aiuole curvilinee.

ALUBORD is the ideal border for DIY enthusiasts, but also devoted to the most demanding landscape professionals.
It allows to delimit paving and create the containment of flower beds or paths made with gravel, interlocking pavers, resin-coated pebbles or other filling materials.

INTENDED USE

- Flower beds, paths or gravel paving
- Vegetable gardens
- Paving with Gravelfix
- Green roofs

ADVANTAGES

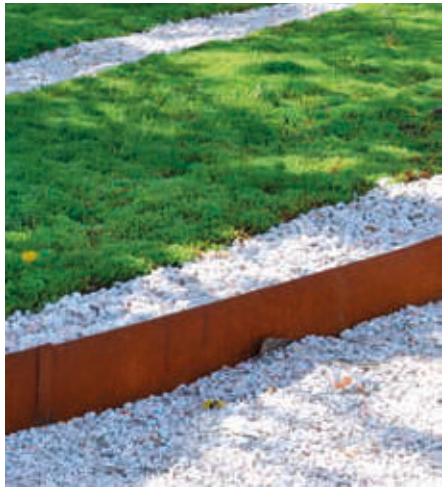
- Lightweight
- 100% recyclable sustainable solution
- Simple installation
- Practical
- Corrosion resistant
- Weatherproof
- Adapts to curvilinear trends
- Long lasting

SAFETY

The upper surface of the border is rounded to avoid cuts.

LAYING IN THE CURVE

ALUBORD is a flexible product, easy to lay even in curved flowerbeds.



ALUBORD ALUMINUM

Le bordure in alluminio sono disponibili nelle seguenti misure e formati:

- ALUBORD ALUMINUM IA
  altezza di 14 cm, accoppiabile senza l'ausilio di giunzioni e dotata di asole per poterla ancorare facilmente al terreno
- ALUBORD ALUMINUM I
  altezze di 10 cm e 20 cm, accoppiabile senza l'ausilio di giunzioni
- ALUBORD ALUMINUM L
  altezza di 5 cm, sezione ad "L" ideale per delimitare pavimentazioni di ogni tipo e ancorabile al terreno mediante le asole poste alla base

The aluminium borders are available in the following sizes and formats:

- ALUBORD ALUMINUM IA
  height of 14 cm, self-fitting without the aid of joints and equipped with slots so that it can be easily anchored to the ground
- ALUBORD ALUMINUM I
  heights of 10 cm and 20 cm, self-fitting without the aid of joints
- ALUBORD ALUMINUM L
  height of 5 cm, the L - shaped section is ideal for delimiting paving of any type and is anchored to the ground by means of the slots placed at the base

ALUBORD CORTEN

Le bordure in acciaio corten, caratterizzate dal colore ruggine sono disponibili nelle seguenti misure e formati:

- ALUBORD CORTEN I
  altezza di 14 cm, bordura accoppiabile con l'ausilio di piastre di giunzione
- ALUBORD CORTEN L
  altezza di 5 cm, sezione ad "L" ideale per delimitare pavimentazioni di ogni tipo e ancorabile al terreno mediante le asole poste alla base

The corten steel borders, characterized by rust color, are available in the following sizes and formats:

- ALUBORD CORTEN I
  height of 14 cm, border can be coupled with the aid of joint plates
- ALUBORD CORTEN L
  height of 5 cm, the L - shaped section is ideal for delimiting paving of any type and is anchored to the ground by means of the slots placed at the base

ALUBORD PLASTIC

La bordura in plastica, economica, pratica e di facile posizionamento:

- ALUBORD PLASTIC I
  altezza di 10 cm, autoincastrabile senza l'ausilio di giunzioni

The plastic borders, economic, practical and easy to install:

- ALUBORD PLASTIC I
  height of 10 cm, self-fitting without the use of joints

ALUBORD + PaMiDre
PACCIAMATURA MINERALE DRENANTE

ALUBORD può essere utilizzato in abbinamento alla pacciamatura naturale PAMIDRE per delimitare le aiuole e creare uno strato di materiale inerte che impedisce la la crescita di piante infestanti.

ALUBORD can be used in combination with natural mulch PAMIDRE to delimit flowerbeds and create an aggregate material layer that prevents weed growth.

ALUBORD + GRAVELFIX

L'utilizzo di ALUBORD in abbinamento alla lastra alveolare Gravelfix è inoltre consigliato per creare pavimentazioni stabili o soluzioni di contenimento per vialetti in ghiaia.

The use of ALUBORD in combination with the Gravelfix honeycomb sheets is also recommended for creating stable floors or containment solutions for gravel paths.

POSA

Il montaggio, estremamente semplice, rende il prodotto veloce da installare ed è caratterizzato da un basso costo di applicazione che riduce sensibilmente la manodopera e la manutenzione.
La flessibilità di ogni elemento facilita la posa anche con andamenti curvilinei.

INSTALLATION

The extremely simple assembly makes the product quick to install and applied with low application costs by significantly reducing labour and maintenance. The flexibility of each element facilitates even curved installtion.

1

Tracciamento dell'aiuola.

Tracing the flowerbed.

2

Misurazione lunghezza e segnatura per taglio a misura.

Measuring the length and marking a sign for cutting.

3

Taglio a misura con flessibile.

Cutting to size with a flexible saw.

4

Curvatura e accoppiamento con incastro.

Curving and coupling with interlocking.

5

Ancoraggio al terreno con picchetti o altri metodi.

Anchoring to the ground with pickets or other methods.

6

Compattazione del terreno intorno alla bordura.

Compacting the soil around the border.

7

Stesura del telo in tessuto non tessuto di protezione.

Laying of the non-woven protective cloth.

8

Stesura di ciottoli o altro materiale.

Laying of pebbles or other material.

9

Aiuola completata.

Flowerbed completed.

ROCK BOX

GABBIONI
GABIONS

ROCK BOX è la soluzione tecnica che consiste in gabbioni e muri componibili: una scelta pratica e duratura che garantisce risultati eccezionali per estetica e solidità.
I gabbioni vengono riempiti con pietre naturali scelte tra i granulati di nostra produzione.
Sono resistenti, facilmente trasportabili e pronti per la posa. Grazie alla facilità di movimentazione e alla varietà di riempimento, rappresentano un prodotto versatile ed allo stesso tempo solido, ideale come strumento per arredo di giardini e spazi urbani. Le gabbie possono essere fornite anche vuote per un riempimento in loco.

DESTINAZIONI D'USO

- Recinzioni
- Arredo urbano
- Bacini acquatici
- Muri di contenimento
- Pareti decorative
- Verde verticale
- Barriere antiterrorismo
- Fondazioni

VANTAGGI

- Facile e veloce da posizionare
- Facilmente removibile e riutilizzabile
- Gabbie antierosive e indeformabili nel tempo
- Pronto per la posa
- Gabbioni drenanti
- Possibilità di raggiungere altezze elevate
- Vasta scelta di riempimento con pietre naturali
- Barriera antirumore
- Adattabile ad ogni contesto progettuale
- Grande modularità
- Soluzione ecologica ed economica
- Gabbie disponibili in differenti dimensioni

ROCK BOX is the technical solution for gabions and modular walls: a practical and long-lasting choice that guarantees exceptional aesthetically pleasing results.
The gabions are filled with natural stones chosen from our gravel products.
They are resistant, easy to transport and ready for installation. Thanks to the ease of handling and the variety of fillings, they represent a versatile and at the same time solid product , ideal as a tool for furnishing gardens and urban spaces.
Cages can also be supplied empty for on-site filling.

INTENDED USE

- Fences
- Urban furniture
- Water basins
- Retaining walls
- Decorative walls
- Vertical greenery
- Counter-terrorism barriers
- Foundations

ADVANTAGES

- Quick and easy to place
- Easily removable and reusable
- Anti-erosion and non-deformable cage over time
- Ready to install
- Draining gabions
- Possibility of reaching high heights
- Wide choice of filling with natural stones
- Noise barrier
- Adaptable to any design context
- Great modularity
- Ecological and economic solution
- Cages available in different sizes

CARATTERISTICHE TECNICHE

GABBIE ALUZINCATE FILO DOPPIO 6 mm MAGLIA 50X200 mm

- Gabbie strutturali per muri
- Estremamente resistenti
- Sollevabili grazie al sistema a pettine
- Velocità di posa
- Riempimento consigliato con inerti di pezzatura dai 60 ai 200 mm

GABBIE ALUZINCATE FILO SINGOLO 6 mm MAGLIA 19X200 (sormontabili e non sormontabili)

- Gabbie per muri e recinzioni
- Adattabili in lunghezza ed in altezza
- Barriere acustiche e visive
- Grazie al sistema brevettato, disponibili anche nella versione sormontabile
- Riempimento consigliato con inerti di pezzatura dai 30 ai 60 mm

TECHNICAL FEATURES

GABIONS IN GALVANISED STEEL DOUBLE WIRE 6 mm MESH 50X200 mm

- Structural gabions for walls
- Extremely resistant
- Can be lifted thanks to the "comb" system
- Quick installation
- Filling recommended with aggregates of size 60 to 200 mm

GABIONS IN GALVANISED STEEL SINGLE WIRE 6 mm MESH 19X200 mm (surmountable and not surmountable)

- Gabions for walls and fences
- Adaptable in length and height
- Acoustic and visual barriers
- thanks to the patented system, also available in the surmountable version
- filling recommended with aggregates of size 30 to 60 mm

GABBIONI FILO DOPPIO - GABIONS DOUBLE WIRE

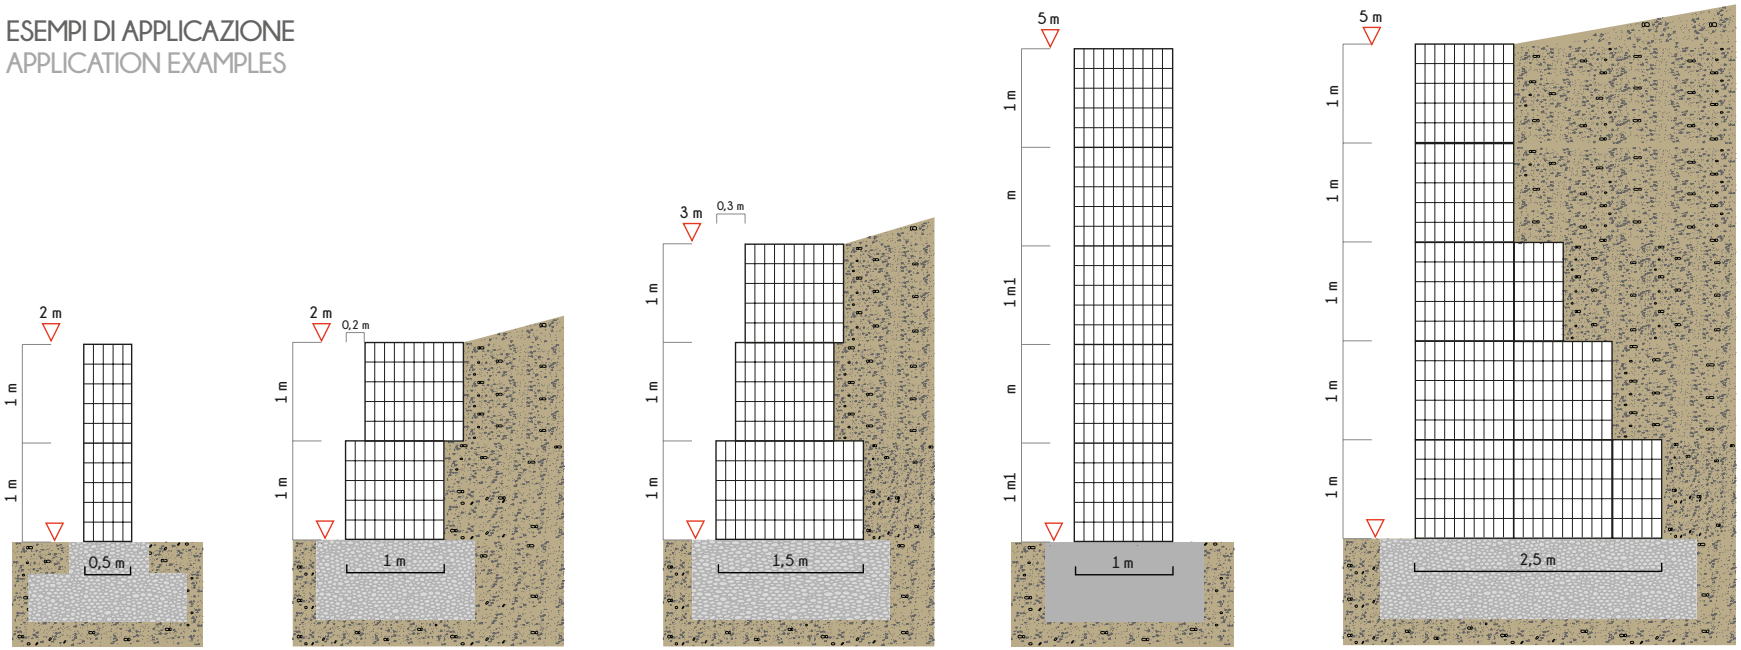
Accessori fornibili a parte:
- pettini di sollevamento
- pinzatrice manuale
- punti metallici (scatola da 1600 pz)

ESEMPI DI APPLICAZIONE
APPLICATION EXAMPLES



Le sopraindicate soluzioni sono puramente a titolo informativo basate sull'esperienza maturata negli anni. Qualsiasi realizzazione con i Rock Box deve essere dimensionata e realizzata a regola d'arte tenendo in considerazione i carichi strutturali, al fine di garantire la struttura sicura e stabile nel tempo.

The above solutions are for information purposes only and are based on the experience gained over years. Any realization with Natural Stone Boxes must be dimensioned and realized in accordance with practice rules, taking into consideration the structural loads, in order to guarantee a safe and stable structure over time.

PREPARAZIONE DELLE GABBIE

1. Assemblaggio gabbione
2. Riempimento gabbione e vibrocompattazione (opzionale)
3. Chiusura della gabbia
4. Sollevamento e posizionamento dei gabbioni

Il piano di posa deve essere dimensionato e realizzato a regola d'arte per poter sorreggere in totale sicurezza il carico dei gabbioni.

GABIONS PREPARATION

1. Assembly of the gabion
2. Filling and vibrocompaction (optional)
3. Closure
4. Lifting and positioning

The laying surface must be dimensioned and professionally designed in order to be able to support the load of the gabions in total safety.

GABBIONI FILO SINGOLO - GABIONS SINGLE WIRE

TIPO - TYPE	L [cm]	W [cm]	H [cm]
1 *	100	25	50
2 *	200	25	50
3 *	100	25	100
4 *	200	25	100

* DISPONIBILI NELLE VERSIONI SORMONTABILI E NON SORMONTABILI

Accessori fornibili a parte:
- innesto diritto singolo
- innesto diritto doppio
- innesto singolo con piastra
- innesto doppio con piastra
- copri teste
- tappi di allineamento
- pettini di sollevamento
- pinzatrice manuale
- punti metallici (scatola da 1600 pz)

PACCIAMATURA MINERALE DRENANTE

PACCIAMATURA DRENANTE
DRAINING MULCH

PAMIDRE: la pacciamatura minerale drenante che si posiziona nelle aiuole o attorno al fusto degli arbusti per evitare la crescita di piante infestanti.
La funzione principale è quella di aiutare a tenere sotto controllo le erbacce ma anche prevenire l'eccessiva evaporazione dell'acqua che potrebbe rendere il terreno eccessivamente asciutto nel periodo estivo. Nelle regioni fredde la pacciamatura svolge anche una funzione protettiva delle radici dal gelo invernale.
PAMIDRE è di facile applicazione e non necessita manutenzione.

LA POSA

La pacciamatura Pamidre si stende nello spessore di 2-3 centimetri su un fondo livellato e ripulito da erbacce.
Occorre dosare 1,5 litri d'acqua per sacco, mescolare omogeneamente il prodotto e applicarlo direttamente nella zona desiderata. In presenza di alte temperature la quantità d'acqua deve essere aumentata. L'indurimento dello strato avviene dopo circa 2 giorni.
Essendo applicato su un fondo non stabile il prodotto non è calpestabile.

PAMIDRE: the mineral draining mulch that is positioned in flowerbeds or around the stem of the shrubs to avoid the growth of weeds.
The main function is to keep weeds under control but also to prevent the excessive evaporation of water that could excessively make the soil dry during summer.
In cold regions, mulch also protects the roots from winter frost.
PAMIDRE is easy to apply and requires no maintenance.

THE INSTALLATION

Pamidre mulch extends to a thickness of about 2 to 3 cm on a levelled ground and cleansed from weeds.
1.5 litres of water per bag must be dosed, homogeneously mixed with the product and applied directly in the desired area.
In the presence of high temperatures the amount of water must be increased. The layer hardens after about 2 days.
As the product is applied on a non-stable substrate, it is not walkable.

CALCESTRE

CALCESTRE

Materiale in stabilizzato naturale, il prodotto ideale per creare pavimentazioni all'aperto, pedonali, strade bianche e piste ciclabili. CALCESTRE è disponibile nel colore BIANCO ottenuto da una miscela di varie pezzature di pura dolomia bianca.
L'aspetto finale sarà quello di un sentiero realizzato con una finitura di ghiaia fine.
Considerando che questo prodotto ha limitate capacità drenanti si consiglia di dare la giusta pendenza.

MODALITÀ DI POSA Si consiglia la posa di Calcestre con l'ausilio della vibrofinitrice e nel contempo eseguire abbondanti innaffiature ad acqua con ugelli a getto fine per inumidire il materiale. Successivamente compattare con l'ausilio di rullo compattatore.

The material is naturally stabilized and is the ideal product for creating outdoor pavements, pedestrian, white roads and cycle paths. CALCESTRE is available in WHITE colour obtained from a mixture of various sizes of pure white dolomite. The final appearance will be that of a path made with a fine gravel finish. Considering that this product has limited draining capacity, it is recommended to give it the right slope.

LAYING METHOD We recommend laying CALCESTRE with the help of a wheel paver and at the abundant watering with fine jet nozzles to moisten same time performing the material and finally compacting with the help of a roller.

CALCESTRE + LEGANTE

È possibile realizzare una pavimentazione solida miscelando il Calcestre con acqua e cemento bianco o calce bianca. Quando si parla di cemento bianco si fa riferimento a prodotti di altissima qualità per la purezza delle materie prime impiegate e per lo specifico processo produttivo, con un valore estetico di bianco ineguagliabile e costante nel tempo.
La collaborazione con i maggiori produttori di cemento ha portato all'ottimizzazione di un materiale progettato per l'utilizzo come pavimentazione pedonale e/o ciclabile, stabile, non pulverulenta caratterizzata da resistenza in funzione del grado di compattazione.
Al momento dell'ordine di Calcestre sarà fornita la scheda operativa di posa con le referenze tecniche del legante più indicato per l'applicazione in accordo ai risultati della campagna di ottimizzazione svolta.

CALCESTRE + BINDER

It is possible to create a solid floor by mixing Calcestre with water and white cement or white limestone. When we talk about white cement we refer to products of the the highest quality for the purity of raw materials used, and for the specific production process, along with the unparalleled aesthetical feature of this color which is constant over time. The collaboration with major cement producers has led to the optimization of a material designed to be used as a stable, non-dusty pedestrian and/or cycle pavement, characterized by resistance depending on compaction degree. At the time of ordering Calcestre the operational card of installation will be provided with the technical references of the most suitable binder for application in accordance with the results obtained by the optimization campaign.

GRANULOMETRIA GRANULOMETRY	SPESSORE RACCOMANDATO RECOMMENDED THICKNESS	NOTE NOTES
0-12 mm 0-16 mm	2-4 cm	Da posare al di sopra di una massicciata stradale To be laid over the roadbed
0-50 mm	15 cm	Da posare a diretto contatto con il terreno To be laid in direct contact with the ground
0-12 mm + LEGANTE + BINDER	10 cm	Da posare al di sopra di una massicciata stradale To be laid over the roadbed
