

Express yourself with Ecophon Solo™

Ecophon®
SAINT-GOBAIN

A SOUND EFFECT ON PEOPLE

The original acoustic cloud

Congratulations. Your design palette has been updated, giving even more freedom to express yourself. Ecophon Solo™ is the original acoustic cloud, once a first of its kind, now improved with new creative options. This free-hanging sound absorber comes in all the shapes, colours and sizes you need to fulfil your artistic ideas. And if you have unique tastes, creating your very own Solo Freedom is probably the thing for you.

With its excellent acoustic qualities, Solo is our bravest example of how design and functionality can harmonize to create atmospheres that are pleasing to the eye, the ear and the mind.

With a positive contribution to healthy buildings together with a low and transparent environmental footprint, Ecophon Solo™ panels can help you achieve the highest levels of your green buildings projects.

Learn more about Solo at ecophon.com, including technical information, installation help and detailed sustainability information.

This publication shows products from Ecophon product range and those of other suppliers. The specifications are intended to provide a general guide to which products are most suitable for the preferences indicated. Technical data is based on results obtained under typical testing conditions or long experience in normal conditions. The specified functions and properties for products and systems are only valid on condition that instructions, installation diagrams, installation guides, maintenance instructions and other stated conditions and recommendations have been taken into consideration and followed. Deviation from this, such as changing specific components or products, will mean that Ecophon cannot be held responsible for the function, consequences and properties of the products. All descriptions, illustrations and dimensions contained in this brochure represent general information and shall not form part of any contract. Ecophon reserves the right to change products without prior notice. We disclaim any liability for misprints. For the latest information go to www.ecophon.com or contact your nearest Ecophon representative.

Freedom to create **high-end design**

How about a design element that can take your architectural visions all the way? Ecophon Solo™ Freedom lets you create your own, unique shapes not found anywhere else. It gives wings to your ideas and lets you go beyond what's possible with standard shapes.

Release your inspiration. Dare to be different. There is a space waiting for you to make an impression. Ready for the next level of artistic design.

A different perspective on acoustic clouds

Are you a visual explorer? Curious to see what happens when you turn things around? Then you should have a look at our free-hanging baffles. Solo lets you experience the acoustic cloud from a different perspective. Sideways.

Hanging from the ceiling, baffles can be used to form distinct lines, rolling waves or zig-zaggy patterns. Mounted on walls, they add interesting contours and depth to any space. Both with the benefit of effectively taming unwanted noise.

We like to make it easy to implement your ideas. That's why we offer our clever Connect™ mounting accessories for ceiling and for wall. A no fuzz mounting system to easily position every panel just as desired.

See the world in colours

What would life be without colours? With colours you can express emotions, values and attitudes. Colours are a highway direct to our hearts, strengthening the design message and enhancing the visual expression.

Since the free-hanging Solo panels are surrounded by air, the background colours of the room can contribute to an even more interesting impression. If you give Solo a colour similar to the room or the furniture, balance and harmony will prosper. Or, pick bold contrast colours to let Solo stand out as eye-catching solitaires.

Bright design deserves good lighting

Let there be light. Either it's natural light flowing in from large windows, or carefully calibrated artificial light, it can be used to support your architectural vision. Creating depth and contrast. Adding richness to all colours. Getting people in the right mood.

With Solo you have many choices for lighting – integrated in the panels like the new Solo Rectangle Line, between or behind them, or perhaps coloured spotlights illuminating selected parts of the acoustic cloud. Light adds a little bit of magic and gives life to the Solo installation.

Think big – make a great impression

Big is beautiful, right? And if grandness is your thing, there is always a great Solo solution to match it.

With Solo it's easy to realize even the most sizeable architectural visions. The standard range includes some of the largest acoustic panels on the market, both rectangular and circular. They are often the preferred choice for large spaces, but can also be used to make a statement in a smaller room. With Solo, large sizes are a creative option to consider. Installing them is also a treat, because even though they are big, they still only need four fixing points.

Level up your design ideas

You can always look at things from different angles. This is especially true when it comes to Solo, where the panels can be mounted almost any way you like.

Attach them as close as 50 mm to the ceiling with our new discrete, direct fixing. Or make use of the fact that the Solo panels are just as good looking on both sides. In spaces with high ceilings, like atriums and similar, Solo can preferably be stacked in multiple levels and be viewed from both below and above. In this context the visible wires become an interesting part of the design.

A shape for every need

Ecophon Solo™ is the original acoustic cloud. It has proven its qualities for over a decade, in numerous installations all over the world. With several size options and classic shapes, you have all the possibilities to create, whether you like it round, square or rectangular. Big or small.

And of course, if standard is not your game, you can always rely on Solo Freedom for custom-made shapes with your own design.

Ecophon Solo™ panels contribute to a healthy indoor environment with naturally low VOC emissions, as they do not contain any added formaldehyde or masking agents. As a result, all Solo panels with 3rd generation glass wool comply with the most stringent regulations and certifications in the construction product market - the California Emission Regulation standard and French VOC A+.

All Ecophon Solo™ products can be dry-wiped daily, vacuumed daily and wet-wiped weekly.

More product information such as technical properties, installation help and sustainability documentation can be found at ecophon.com/solo

Akutex™ FT

The Akutex™ label guarantees that the product carrying it has a superior surface technology. Our research and development will always focus on visual aspects, acoustic properties, working environment, architectural trends and environmental aspects. This ensures that Akutex™ is always one step ahead.

A SOUND EFFECT ON PEOPLE

Ecophon is the leading supplier of acoustic solutions. We contribute to healthier indoor environments, improving quality of life, wellbeing and working performance. As evolution has adapted the human senses to a life outdoors, our focus is to bring the ideal acoustic environments of nature into our modern indoor spaces. We know they will have a sound effect on people.

The principles guiding our work are grounded in our Swedish heritage, where a human approach and a common responsibility for people's lives and future challenges come naturally.

Ecophon is part of the Saint-Gobain Group, a world leader in sustainable habitat solutions. This is also one of the top 100 industrial groups in the world, constantly innovating to make living spaces more comfortable and cost-efficient. Saint-Gobain offer solutions to the major challenges of energy efficiency and environmental protection. No matter what new needs emerge in the habitat and construction markets, the future is made of Saint-Gobain.
