# Verner Panton

# Verner Panton

(1926 -1998)

---

Among the giants of Danish design, Verner Panton established a unique reputation for his exuberant originality and tireless experimentation. Panton created lamps, furniture and textiles – and was also a sought-after interior designer. Although he was at the forefront of mid-century Danish Modern, Panton's contribution was anything but mainstream. He enthusiastically embraced new materials, he splashed with a bold colour palette, and he playfully imbued many of his sculptural creations with a strong graphical expression – without ever compromising on quality or workmanship.

Panton's iconic designs have emerged as contemporary design classics – as strikingly inventive now as they were 50 years ago.

Panton's interior installations have attained legendary status. The most famous examples are the 'Visiona' ship installations for the Cologne Furniture Fair (1968 and 1970), the Spiegel publishing headquarters in Hamburg (1969) and the Varna restaurant in Aarhus (1971).

Verner Panton in his own words:

"The main purpose of my work is to provoke people into using their imagination. Most people spend their lives living in dreary, grey-beige conformity, mortally afraid of using colours. By experimenting with lighting, colours, textiles and furniture and utilizing the latest technologies, I try to show new ways, to encourage people to use their imagination and make their surroundings more exciting".

## *Series 430 chair linking*

Although the 430 Chair was designed 50 years ago, it is still perfectly suited for conference settings today thanks to this simple and elegant linking device. The link is made from aluminium, is very strong and fully comply with BS EN 14703 :2007.

Due to its ingenious design, the device folds away completely underneath the seat when not in use. The device also makes it possible to replace a chair in the middle of a row without moving other chairs and it can even be retro-fitted if the need for linking arise at a later stage.
